

How the Amster upgrade process works

Overview

The process can be explained with the following sequence of steps:

1. AM.n perform amster export to amster export files
2. AM.(n+1) installed with default configuration
3. AM.(n+1) upgrader tool run with rules AM.n AM.(n+1) over exported amster files
4. AM.(n+1) amster import from exported amster files

The process can be visualised in the following diagram:
