## Threat Modelling

As we will be embracing threat modelling as part of our Secure Development Lifecycle adoption, I thought this might be beneficial to understand what threat modelling is all about or a refresher for those of you that have done this many times.

Adam Shostack has been doing TM for over 20 years and has made his course available for free using LinkedIn training. (Just click the “next video” link where it asks you to sign up for a free 1 month trial).

Here is a link to a his 45 min course. <https://www.linkedin.com/learning/learning-threat-modeling-for-security-professionals>
